

Easy Cut 4000

Product Photo:

Easy Cut™
4000

Protect your staff from injury!

No more blood, injury claims, downtime, bandage or ambulance !

Protect your investment and product from damaging !

No more penalty from delay, re-order, repair or angry customers !

Solution :

Plan A: Replacing workers with high-tech machineries and purchase extensive coverage insurance packages. It also comes with a premium price tag and possible a work force strike.

Plan B: Easy Cut safety Knife . For a fraction of the price from plan A and only a phone call away, all problem solved. It also comes with a knife holder and spare blades.

Easy Cut will be the ultimate solution to protect your staff, investment, and product. Economical, quick, easy and trouble free !

3-settings of precision blade-depth with our patented " Multiple blade-depth settings ". Quick and easy blade adjustment for cutting different material or surface.

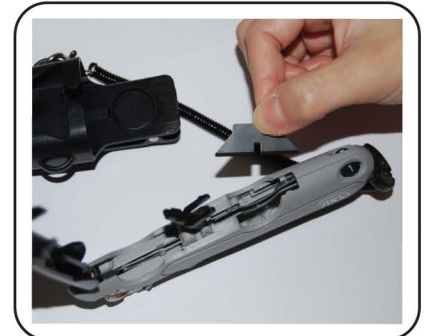

Duo-side extendable edge guards. Provide precise and clean edge opening every cut !

Knife holder is designed for both left and right handed personnel. Avoid knife misplacement which induces extra costs.

Top loading blades with storage for spare blades. Increase efficiency on production line without disruption.

Patented: Blade Vanishing Technology
Patented: Radius-Blunt Tip Blade

With it's built-in tape splitter located at the rear of the unit, handlers can open boxes without blunting the blade. Providing extra protection from injuries or damaging products!
